# ABOUT US

The HEXA commitment to excellence is built upon a strategic global structure, uniting the world's best in design and production:

- **US Innovation Driven (Texas, USA)** : Hexa LLC serves as our design center. This US-based Engineering Office is the engine of our innovation, driving every product through cutting-edge design engineering and strategic management.
- **IN Quality Engineered (India)** : Our state-of-the-art operations facility in India ensures we maintain world-class quality standards while delivering cost-effective production.

# Welcome to the World of Automotive Excellence

Hexa Automotive offers a comprehensive range of high-quality automotive service equipment designed for precision, durability, and efficiency, ensuring every repair and maintenance job is handled with ease and excellence.

**PRO  
ALIGN 3D**

**3D Wheel Aligner** 

**Stay Straight, Drive Ahead**

## **ProAlign 3D – Wheel Alignment System**

Experience unmatched precision with ProAlign 3D, the next-generation wheel alignment solution designed for modern workshops. Engineered with advanced 3D imaging technology, it ensures faster, more accurate alignments with minimal effort.

**ProAlign 3D – Precision Made Easy**

**CUSTOMISE YOUR COLOUR : RED | BLUE | GREY**

**HEXA**

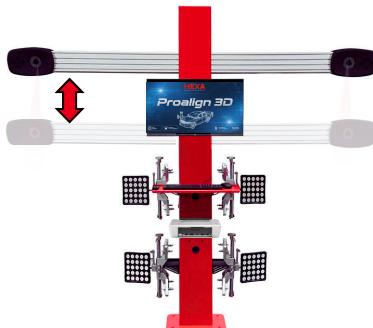

## Features

- High-Definition Cameras** : Capture every angle with pinpoint accuracy.
- User-Friendly Software** : Simple interface for quick operations.
- Fast & Reliable Results**: Reduce downtime, boost productivity.
- Durable Build**: Designed to withstand heavy workshop use.
- Versatile Compatibility** : Works with a wide range of vehicles.

## Technical Specification

Camber (F/R)	$\pm 15^{\circ}00'(\pm 00^{\circ}02)$

### Exhaust Extraction System

Designed specifically for motorcycles & cars, our exhaust hose system ensures the safe and efficient removal of hazardous exhaust fumes during maintenance, testing, or engine diagnostics. Built with high-temperature resistant materials and flexible design, it provides reliable performance in workshops and service bays, protecting both technicians and the environment.

- **High-Temperature Resistance**: Engineered to withstand extreme exhaust heat.
- **Flexible & Lightweight Hose Design**: Easy to maneuver and connect
- **Universal Compatibility**: Fits a wide range of motorcycle exhaust outlets
- **Efficient Fume Removal**: Protects technicians / customers from harmful emissions
- **Durable Construction**: Made with premium, crush-resistant materials
- **Space-Saving Options**: Customizable extraction arms available to optimize floor space.

### Exhaust Extraction System

Drop Vent systems are a simple yet effective solution for eliminating exhaust gases in small bike / cars repair shops and garages. It can be installed with a separate fan or connected to a central ventilation system.

- The exhaust device consists of an extraction hose with a gas intake nozzle which is fixed to the mounting bracket nipple.
- An air extractor is installed directly on the mounting bracket (for DPF models), and a balancer with extraction hose support is suspended from it on a special bracket.
- In the non-operational state, the extraction hose is held by a balancer in the form of a smoothly bending loop, while the free end of the hose with the gas intake nozzle does not touch the floor and does not interfere with the work and passage of personnel.
- When connected to the exhaust pipe of the car, the hose is straightened. When disconnected, the hose returns to its original position with the help of the balancer.

### Air Compressor

#### THE ULTIMATE GARAGE COMPANION

Designed for professionals who accept nothing less than excellence, our air compressor is your trusted partner in the workshop. Whether you're servicing vehicles or running high-demand pneumatic tools, this machine delivers unwavering performance where it counts.

Engineered with intelligent design and cutting-edge components, it provides consistent air power, long-term reliability, and effortless operation—day in, day out.

#### Key Highlights

- ✓ High-Performance Output – Built to handle the toughest garage demands
- ✓ Smart Engineering – Compact yet powerful, with optimized airflow efficiency
- ✓ Durable Construction – Designed for longevity under heavy-duty usage
- ✓ Versatile Use – Perfect for automotive work, painting, inflating, and more

**Upgrade your garage with the air solution that professionals trust**
